Air Filter Products

Bridge Style Booth

The double stack in the back of the booth will need 12 grids. (Eight 12 x 36 and Four 24 x 36 grids). the grids pop into place very easily making installation simple. The kit, part number 020-704, contains all the grids plus one change of filter media to get the booth started. When it is time to replace the filter media you can purchase the replacement roll, part number 025-336 which is a roll of 36" x 300' filter media. The filter media roll will change out the exhaust about 15 times. The benefits of this replacement system are (1) less expensive, (2) water can not damage filter media and (3) better filtration.

Non Bridge Style Booths

Measure length of opening (ex. 84") divide by 24" (grids are 36 x 24 or 36 x 12). For that opening you would use 3 - 36 x 24 and 1 - 36 x 12 grids, which easily snap in place. If it doesn't work out evenly you can have 1-2" between the grids. Use a 36" wide paint arrestor (ex. 017-241) and cut to length. The media will hang on the prongs that stick out from the grids.

Part Number	Size	Description
078-008	36" X 24"	Snap-in Grid
078-007	36" X 12"	Snap-in Grid
025-336	36" X 300'	XHD Media Roll
017-241	36" X 100'	107X Media Roll
